

FDIC Insured Deposit Program (Pershing IRAs & non IRA Accounts)

Updated 11/16/2018

Putting your money to work isn't just about investing; it's also about earning a return on cash that is waiting to be invested. That is why SagePoint Financial, Inc. ("SagePoint") offers clients a "Sweep Program" designed to enable you to earn a return on your cash at competitive rates. By participating in the SagePoint's Sweep Program, your cash balances will be transferred into accounts at banks whose deposits are insured by the Federal Deposit Insurance Corporation ("FDIC"), or, for certain accounts, in a money market mutual fund.

Under the FDIC Insured Deposit Program ("Deposit Accounts"), available cash balances (from security transactions, dividend and interest payments and other activities) in your eligible Pershing, LLC brokerage accounts will automatically be deposited into interest-bearing FDIC insured deposit accounts at one or more of the banks set forth below.

Funds in the Deposit Accounts at each Bank are eligible for deposit insurance by the FDIC, up to a total of \$250,000 in principal and interest per depositor in most insurable capacities (e.g. individual, joint, etc.) when aggregated with all other deposits held in the same insurable capacity at a Bank. Pershing, LLC will deposit the available cash in your brokerage account in a Deposit Account at one or more of the Banks listed below, up to \$246,500 for an individual account, and \$493,000 for joint accounts of two or more, irrespective of the capacity in which you hold your brokerage account, and the maximum applicable FDIC insurance coverage available. Your funds will be eligible for up to \$2,500,000 for individual accounts or \$5,000,000 for joint accounts of total FDIC insurance coverage, subject to applicable limitations. Once \$246,500 (or \$493,000 for joint accounts of two or more) has been deposited in each of the Banks, any additional funds will be deposited in an "Excess Bank" without limit and without regard to maximum available FDIC insurance coverage.

For its services under the Program, including making the platform available, SagePoint receives a per account fee each month. SagePoint's fee is not based on the amount of assets in the Program or your account. SagePoint's compensation under the Program does not depend on or vary with, and is not affected by, the actual amounts held in the deposit accounts or your account. As provided for below, the SagePoint Program account fee schedule will be indexed to the current Federal Funds Target ("FFT") Rate. Under the fee schedule, increases in the FFT Rate will result in increased compensation for SagePoint. SagePoint can change the applicable fee schedule upon 30 days advance notice to you. Although it is generally anticipated that SagePoint's fees under the Program will be offset by the amounts paid by the Program Banks, SagePoint reserves the right to withdraw or debit the monthly account fee, or a portion thereof, from your account in the event or to the extent that the amount received from the Program Banks and paid over to SagePoint by the administrator for the period is less than SagePoint's applicable fee for the same period.

SagePoint will be paid a maximum monthly per account fee of \$22 for its services in connection with maintaining and administering the Program. In a lower rate environment, SagePoint's fee will be reduced based on the FFT Rate, which increases the likelihood of Program customers receiving a positive interest rate. The fees paid to Sagepoint may be reduced to as low as \$1 per account per month. The monthly account fee increases and decreases by \$0.08 with every 1 basis point (a basis point is equivalent to 0.01%) change in the FFT. The formula that will be used to calculate SagePoint's fee is **\$1 + (\$0.08 x FFT), with a maximum monthly per account fee of \$22**. FFT rate is the rate or the range of rates as expressed in percentages most recently announced by the Federal Open Market Committee of the Federal Reserve System that is the Committee's target for the rate charged by banks on unsecured loans of the banks' reserve balances at Federal Reserve Banks. In cases where the FFT rate is a range of rates, the FFT rate will be deemed to be the midpoint of the range rounded to the nearest hundredth of a percent. Examples of how the fee is calculated using the above formula:

Example #1

Federal Funds Target range = 75-100 basis points
Midpoint of range is 87.5 basis points, round up to nearest whole number = 88 basis points
Monthly per account fee = \$1.00 + (\$0.08 x 88) = **\$8.04**

Example #2

Federal Funds Target range = 250-275 basis points
Midpoint of range is 262.5 basis points, round up to nearest whole number = 263 basis points
Monthly per account fee = \$1.00 + (\$0.08 x 263) = \$22.04
Since \$22.04 is greater than the stated maximum monthly fee of \$22; the actual fee would be **\$22**

SagePoint's monthly fee will not generally be seen on your account statement due to the manner in which SagePoint recoups its fee from the Program Banks' payments, as discussed above. SagePoint may waive any portion of its fees, or its fee entirely. Each Program Bank will also pay Pershing a fee equal to a percentage of the average daily deposit balance in your deposit account(s) at the Program Banks. Your Financial Advisor will not receive any portion of the fees paid by the Program Banks. The amount of fees received by Pershing, SagePoint, and any other service provider, will affect the interest rate paid on your deposit account(s).
